

## Mobile Mapping Project City of Alexandria

**To:** Mr. James K. Hartmann, City Manager  
City of Alexandria, Virginia  
301 King Street, Room 3500  
Alexandria, VA 22314

**From:** Sonia Krammes, Project Manager TRANSMAP Corporation

**Date:** September 8, 2008

**Reference:** **ON-SIGHT™ HD Mobile Mapping - Vehicle Description**

---

This memo is to inform you and your Citizens that Transmap® Corporation is scheduled to be working within the limits of the City of Alexandria for approximately a two-week period beginning Thursday, September 11, 2008. As a sub-consultant to Timmons Group (Richmond, Virginia), Transmap® Corporation is under contract to the City's Transportation & Environmental Services Department to compile an inventory of city-owned and maintained assets within the limits of the right-of-way of the City's street network. In facilitation of these tasks, we will be employing our ON-SIGHT™ HD Mobile Mapping Vehicle. This is a specially equipped van that obtains high resolution digital imagery and positional (GPS) information of the roadways and associated assets (signs, signals, street lights, etc.) while traveling at posted speed limits. Our technology is such that we will not interfere with normal traffic flow or pedestrians.

We will be driving the van pictured to the right:

Full Size, Ford E-350 – “ON-SIGHT”

Ohio License Plate # **PBH-6801**

**Each of our employees will carry appropriate identification.**

Similar notifications have been sent to the Sherriff, Chief of Police, City Council, and Citizen Assistance Office.

If you have any question or concerns, feel free to contact me.
